

## **ACTIV LITES INSTALLATION INSTRUCTIONS - Visit [Activ-Life.com/install](http://Activ-Life.com/install) for a free video demonstration.**

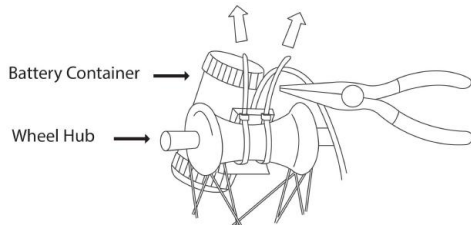

### **STEP 1:**

Unscrew cap of battery container and remove clip. Insert 3 batteries and return to container. Press on/off button to ensure they are properly installed. Remove white backing from rubber pad and stick to battery container mount.

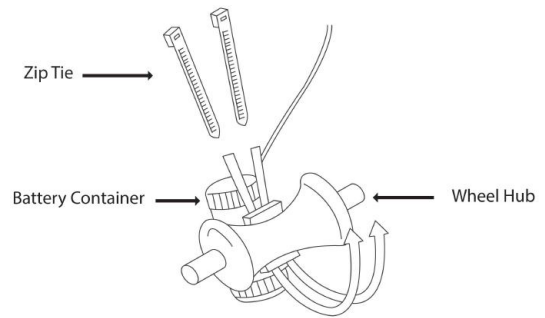

### **STEP 3:**

Tighten both zip ties around the hub of the wheel so that the battery container does not move and is secure. Trim off ends of zip ties.

### **STEP 2:**

Flip your bicycle upside down so that your wheels are easy to access. Place the battery container mount against the center hub of the wheel and connect the zip ties one at a time.

### **STEP 4:**

Wrap the string of lights a few times around the closest spoke out towards the rim. Then snugly wrap every second spoke once.
